

Carrier-to-Case Thrust Bearing

Part No.
28438-01K

GM Powerglide

Sonnax carrier-to-case thrust bearing **28438-01K** has the same load-carrying capacity as the OE bearing and can drop in with no modifications to the carrier or case.

Unlike the OE bearing, the Sonnax bearing is asymmetrical and care should be taken when installing the bearing. The race with the I.D. lip should ride against the planetary carrier as shown.
