Switch Valve Kit

Instructions

Chrysler 45RFE, 545RFE, 65RFE, 66RFE, 68RFE

1. Disassembly

- a. Remove OE retainer clip, set aside for reuse.
- b. Remove and discard OE spring and valve.

2. Bore Reaming

NOTE: Ensure dowel pin in pump body is flush with pump body surface before afixing **VB-FIX**. After reaming operation be sure to reposition dowel pin to original location (**Figure 1**).

Ream TCC switch valve bore (for reaming instructions/reamer care, please visit www.sonnax.com). Sonnax reaming tool kit **F-44912-TL8** and **VB-FIX** are required for this operation.

3. Installation & Assembly

- a. Ensure valve bore and pump body are thoroughly cleaned and clear of debris.
- b. Install Sonnax valve.
- c. Install Sonnax spring, ensuring it seats over valve spring guide.
- d. Compress spring far enough to allow reinstallation of OE retainer clip.

4. Final Testing

Vacuum testing at the port(s) indicated holds the recommended minimum 18 in-Hg (Figure 2).

Dowel pin will need to be

in order to clamp pump cover onto VB-FIX.

Insert retaining clip into Balance Port

while testing

pressed flat against casting

NOTE: To test balance port, valve must be moved and held about .060" to .100" against spring pressure. Inserting a retainer clip (from a neighboring valve train) into the balance port, works well for this purpose (**Figure 2**).

Chrysler 45RFE, 545RFE, 65RFE, 66RFE, 68RFE

1. Disassembly

- a. Remove and save OE retainer.
- b. Remove and discard OE spring and switch valve.

2. Installation & Assembly

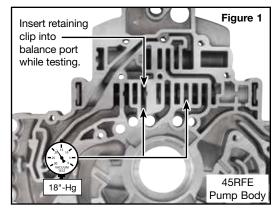

Ream the bore (for reaming instructions/reamer care, please visit www.sonnax.com). Sonnax reaming tool kit **F-44912-TL8** and **VB-FIX** are required for this operation.

3. Installation & Assembly

- a. Be certain all debris has been removed from the valve bore and valve body.
- b. Install Sonnax TC apply limit switch valve.
- c. Install Sonnax spring, ensuring it seats over valve spring guide.
- d. Compress spring far enough to allow reinstallation of OE retainer clip.

4. Final Testing

- a. Vacuum testing at the ports indicated holds the recommended minimum 18 in-Hg.
- b. To test the balance port, valve must be moved and held about .060" to .100" against spring pressure. Inserting a retainer clip (from a neighboring valve train) into the balance port, works well for this purpose.
