

Converter Feed Limit Valve Vacuum Test Tool

Part No.

154740-TL22

NOTE: This is the vacuum testing tool ONLY. This tool is used to test the **OE bore** for diagnostic purposes.

Also Available

Vacuum Test Stand Kit VACTEST-01K

NOTE: This kit contains everything needed to connect to **154740-TL22** testing tool for vacuum testing.

GM 8L45, 8L90

OE Bore Vacuum Testing:

1. Inboard Location

Install Sonnax **154740-TL22** vacuum test tool fully into the bore with vacuum testing tube attached to long end (**Figure 2**). Vacuum should hold a minimum of 18 in-Hg (**Figures 1 & 2**).

2. Outboard Location

Insert Sonnax **154740-TL22** vacuum test tool centered in the port (**Figure 3**). Vacuum at the indicated port should hold a minimum of 15 in-Hg (**Figures 1 & 3**).

NOTE: See page 2 for Figures 2 & 3.
