Park

Reverse

Drive 1st to 6th

Drive Stall

SL  
Solenoid  
ON

SL  
Solenoid  
OFF

Condition: Normal

**Notes:**

*This is a 3 path converter. It has a control similar to Honda 3-shaft and CD4E units. With this control, cooler flow is not affected significantly by TCC apply. These systems should be tested with use of scope. The on/off of the SL solenoid does/should affect cooler flow. Lube pressure tap is also valuable - 6 psi to 11 psi.*
